SUMMARY

Full Stack Software Engineer specializing in Java (Spring Boot) and React, building secure, end-to-end applications with PostgreSQL. Experienced in REST APIs, JWT authentication, and delivering production-ready features with clean, scalable design

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, React, Express.js, Vitest

Databases: PostgreSQL

Tools & Methodologies: REST APIs, JWT Authentication, Spring Security, Unit Testing

PROJECTS

My Spanish Diary | *Spring Boot, React, PostgreSQL*

September 2025 – March 2026

- Built a full-stack journaling application with real-time grammar feedback, integrating LanguageTool API to analyze and highlight user writing errors
- Designed and implemented secure REST APIs using Spring Boot, handling authentication, user data, and grammar processing workflows
- Implemented JWT-based authentication and Spring Security to enforce per-user data access and protect endpoints
- Designed a relational PostgreSQL schema to support scalable user data storage
- Engineered a responsive React frontend to deliver real-time feedback with a smooth user experience

CyberPipeline | *JavaScript, Express.js, Vitest*

September 2024 – May 2025

- Developed and maintained automated test suites using Vitest for Express.js APIs, improving reliability and reducing regression issues
- Identified and debugged API-level issues through structured testing and code reviews
- Collaborated with team members to improve code quality, test coverage, and maintainability of backend services

EXPERIENCE

Undergraduate Teaching Assistant

January 2023 – May 2024

Kansas State University

Manhattan, KS

- Mentored 150+ students in Java programming, helping improve debugging skills and understanding of core programming concepts
- Led small-group sessions focused on problem-solving, testing strategies, and collaborative development practices
- Guided students in identifying and resolving logic errors, improving code quality and development efficiency
